Work Experience:

Zeal IT Consultants   August 2018 - Present

Work alongside the project managers and architects with a team of engineers for the software side of our solutions. Using Agile methodology, build Web, Mobile, and Desktop applications and experiences that assist in the solutions Zeal has created for our customers.

Americans for Responsible Insurance   May 2017 - September

Architected, designed, and developed from scratch using Angular 2, Ionic 2, Typescript, Node.js, Express.js, MongoDb, and Redis. This mobile app was for door-to-door canvassers to have an interactive and responsive form to input their data for each household.

Projects.

- <u>Current</u>: Application to populate and render digital information cards
  - .Net Core, Angular 8
- Workout interval timer.
  - For this project I began with the design. The ring and number placement was inspired by Apple's timer app. And the primary color scheme came from another health and wellness mobile app.
  - Timer.CameronGreens.com
  - HTML, CSS, and Vanilla JS.
- Team website.
  - A CMS backed static website for the Tier 4 Overwatch Group Kaijuwu. With information on the team, players, and coaches.
  - Kaijuwu.Team
  - React JS, Gatsby JS.
- Appointment scheduling web application.
  - A web application that allows company representatives to set availabilities on a calendar and allows a user to schedule appointments with their representatives. It will send emails and notifications across to all people who need to be informed about the appointment.
  - Technologies: .Net Core, Angular 6.
- Web-based graphical CMS
  - Wrote a visual editor for a client's presentation application. They had an antiquated one with hundreds of dropdown and type-aheads. I was able replace them with a visual editor inspired by Figma.
  - Angular 8, Javascript Canvas.
- Optimized & Updated a client's multi-language mobile application on both iPhone & Android
  - Worked with translations of Japanese & English
  - Wrote Automated Regression testing for the mobile applications
    - Appium, Selenium, Sauce Labs

Skills

- JavaScript, HTML5, CSS3, Typescript, C#, GraphQL, SCSS
- Git, Node, React, Vue, Angular, Electron, Android, iOS, React Native, Ionic
