Mobile: React Native, Ionic, Android

PROFESSIONAL EXPERIENCE

Front End Software Engineer
Waste Management Aug 2021 - Present

- Built Sanity content schemas, reusable page components, authoring tools, and migration workflows for the new wm.com platform.
- Integrated Sanity content with Algolia search, including synchronization, indexing rules, environment configuration, and CI/CD workflows.
- Implemented chatbot integration across applications, with page-level controls and fixes for session continuity and authentication handoff.
- Improved Service Hub pickup schedules and ETA journeys, including service classification, saved-address loading, and MyWM navigation.
- Delivered customer-support integrations and UI fixes across live chat, login, localized content, accessibility, and responsive layouts.
- Contributed to React 19 migration, automated tests, and peer reviews across WM's front-end applications.

Associate Software Engineer
JPMorgan Chase Apr 2020 - Aug 2021

- Developed Microsoft PowerPoint Productivity Extension automating formatting and standardization for 30,000+ internal users (.Net Framework, MongoDB, NUnit, Moq)
- Built custom Content Management System enabling users to insert curated images and slides, streamlining content creation workflows
- Created web-based CMS with SSO authentication using JPMC web authentication, providing secure asset management for Office applications (React, Redux, .Net Core, MongoDB)
- Provided level 3 technical support for mission-critical applications and managed bi-weekly release cycles
- Collaborated with business partners to understand banker needs and translate requirements into technical solutions

Software Engineer
Zeal IT Consultants Aug 2018 - Mar 2020

- Developed digital information card application, working with business associates to gather requirements and display client information (.Net Core, Angular 8)
- Built appointment scheduling web application enabling representatives to set availabilities and users to schedule appointments with email notification system (.Net Core, Angular 6)
- Created web-based graphical CMS with visual editor for client presentation application, replacing hundreds of dropdowns with intuitive interface inspired by Figma and Adobe XD (Angular 8, JavaScript)
- Participated in agile ceremonies including daily standups, sprint planning, and retrospectives to deliver iterative value

Systems Administrator
Chad Jones Law Firm Jan 2015 - Dec 2016

- Advanced from IT support intern to full Systems Administrator, demonstrating rapid technical growth and reliability
- Managed and maintained all electronic devices, networks, and systems across multiple office locations
- Administered user accounts, security policies, and access controls to ensure data protection and compliance
